Using science as a starting point, Spanish artist Paul Sanchez Calabró shows special interest in the human figure. She is quite concerned with anatomy, which she has studied in detail as well as the movement of the body and its way of expressing itself. Depending on what she wants to express in each piece, or on the composition, she reduces the elements to their most basic, that is, without losing realism, but in a sophisticated and luxurious background, the observer will capture the most symbolic of human beings.

A collection of 1000+ fashion illustrations by Paul Sanchez Calabró. Available in a hardcover book for \$199.99. Visit [www.paulsanchez.com](http://www.paulsanchez.com) for more information.
